Examination Outline
The following is a detailed outline of the seven major content areas of the examination, with an indication (in parentheses) of the approximate percentages devoted to each area:

**Basic Science and Fundamentals (5%)**
- Immunology
- Vaccinology
- Epidemiology and statistics
- Pharmacology
- Nutrition

**Infectious Diseases (34%)**
(Taxonomy, life cycles, epidemiology, pathology and pathogenesis, differential diagnosis, clinical manifestations, treatment and prevention)

**Intestinal Protozoa**
- Amebiasis, giardiasis
- Infections due to coccidia, *D. fragilis*, non-pathogenic protozoa

**Blood and Tissue Protozoa**
- Malaria
- Leishmaniasis, trypanosomiasis
- Toxoplasmosis, pneumocystosis, infection with free-living amoebae

**Nematodes**
- Intestinal roundworm infections
- Filarial infections
- Larva migrans, dracunculiasis, trichinosis, anisakiasis, gnathostomiasis, angiostrongyliasis

**Cestodes**
- Intestinal and larval cestode infections

**Trematodes**
- Schistosomiasis • Intestinal and liver fluke infections • Paragonimiasis

**Diseases Caused by Bacteria**
- Typhoid fever and bacterial diarrheal syndromes
- Tuberculosis, including drug resistant tuberculosis, and leprosy
sexually transmitted diseases
- Tetanus, diphtheria, anthrax, plague
- Others (plague, brucellosis, etc.)
- Rickettsial and ehrlichial infections
- Leptospirosis
- Neisseria meningitides and bacterial meningitis agents

Diseases Caused by Fungi
- Deep mycosis
- Mycetoma
- Opportunistic mycoses

Diseases Caused by Viruses
- HIV and HTLV-1
- Hepatitis
- Dengue, yellow fever
- Other arboviral infections and viral hemorrhagic fevers
- Respiratory infections, including avian influenza
- Rotavirus infection and other viral causes of diarrhea
- Polio and measles in developing countries
- Smallpox
- Rabies
- Encephalitic viruses

Other Diseases and Conditions (6%)
- Nutritional disorders (principles, infection and nutrition, malnutrition, vitamin and mineral deficiencies)
- Environmental stress (heat, cold, barometric stress)
- Ectoparasites, poisonous plants and animals

Diagnostic and Therapeutic Approach to Clinical Syndromes (15%)
- Undifferentiated fever, eosinophilia, hepatosplenomegaly, etc.
- Tropical dermatology
- Tropical hematology
- Mental health in the tropics
- Tropical gastroenterology
- Tropical surgery, oncology
- Tropical neurology, cardiology, radiology, ophthalmology
- Urologic symptoms
- Radiologic diagnosis
- Manifestations of infection with agents of bioterrorism

Travelers’ Health (18%)
- Clinical epidemiology of diseases of travelers, migrants and immigrants
- Pre-travel risk assessment
- Available vaccines
- In-travel prevention
- Special needs travelers
- Air travel and medical care abroad
- Post-travel evaluation and management
- Cultural considerations

Public Health in the Tropics (7%)
- Maternal child health, breastfeeding
- Preventable illness - children and adults
• Chronic diseases and disability
• Water supply/waste water management
• Sanitation
• Community approaches to primary health care
• Essential drugs

**Epidemiology and Control of Disease (5%)**
• Investigation and control of epidemics, disasters, international emergencies
• Principles of surveillance
• Disease control and implementation of strategies
• Biosafety: containment of current pathogens and emerging pathogens

**Laboratory Diagnosis (10%)**
• Microscopic identification of protozoa and helminths
• Laboratory techniques for identification of parasites
• Macroscopic identification of common helminths and arthropods
• Techniques for identifying bacteria, fungi, viruses
• Interpretation of serologic tests
• Routine procedures
• Molecular diagnosis
