Web address	http://www.bcm.edu/tropicalmedicine/			http://www.bipai.org	
Annual dates	January-March (modules 1, 2, 3, and 4) and July (modules 3 & 4)			July of each year	
Duration of course	3 months (In person: modules 3 and 4; each is two-week long. Online: modules 1 and 2; each is one-month long)			4 weeks didactic weeks plus 1 clinical year (minimum) working in a resource limited country.	
Tuition	domestic \$7,755 USD; international \$8,255 USD (both include tuition and fees)			No tuition; course is intended for BIPAI's Texas Children's Global Health Corps and the Baylor College of Medicine, Department of Pediatrics Global Health Residents.	
Approximate living expenses per month	\$1200 - \$1500			\$0; Living expenses are paid for the Texas Children's Global Health Corps	
Additional academic degrees or credit offered	Certificate of Completion			None offered, Category I Continuing Medical Education hours are accrued	
Brief course description	The Diploma in Tropical Medicine is a three-month program (non-degree course) consisting of four modules. The diploma program is aimed towards healthcare professionals (e.g., M.D.s, P.As) and 3rd and 4th year medical school students pursuing related degree programs who would like to practice or do research in tropical medicine here in the United States or internationally. Completion of this program will prepare healthcare professionals to sit for the CTropMed® — Certificate of Knowledge in Clinical Tropical Medicine and Travelers' Health. The program can be individualized by taking fewer than four modules per session and it includes 36 hours of hands-on laboratory time.			This course will be administered annually to a unique group of physicians: those accepting international employment within BIPAI's Texas Children's Global Health Corps and those accepted into the Baylor College of Medicine, Department of Pediatrics Global Health Residency program. The four-week didactic course will closely mimic the examination outline and the seven major content areas specified by the ASMTH. Faculty for the course will be comprised of highly-trained and experienced physicians and teachers with international experience. Our intensive course will put a particularly heavy emphasis on the management of Pediatric HIV/AIDS in resource limited settings. This course will be followed by ongoing, in-country field experience. Physicians working at one of our centers will be able to network electronically with one another and with Houston based faculty for purposes of consultation on difficult cases and ongoing mentorship.	
Overseas opportunities for clinical time, if available	<b>Links with academic entities (partial list):</b> University of Yucatan, University Cayetano Peru, Monterrey Tec <b>Links with international clinics and hospitals:</b> Baylor International Pediatric AIDS Initiative in Romania, Angola, Botswana, Ethiopia, Kenya, Lesotho, Libya, Malawi, Mozambique, Swaziland, Tanzania, and Uganda <b>Links with Nongovernmental Organizations (NGOs):</b> Shoulder to Shoulder in Honduras			Yes, required in a BIPAI program	
Associated overseas sites				Angola, Botswana, Colombia, Lesotho, Malawi, Papua New Guinea, Swaziland, Tanzania, or Uganda

Annual dates	April - June Diploma Course		Every February/March	
Duration of course	3 months full time		9 Weeks	
Tuition	3780.- Euro		\$6,795 plus \$700 for travel to field trips	
Approximate living expenses per month	400 - 650 housing per month; 600 Euro living per months		Housing \$400-\$900/month; living \$300-\$600/month	
Additional academic degrees or credit offered	Diploma in Tropical Medicine plus 540 CME points		Diploma CME Credit Graduate Credit Hours	
Brief course description	The objective of the annual course is to prepare physicians for professional tasks in tropical and subtropical countries and to enable them to preventively care for visitors of warm climates, to diagnose and to treat imported tropical diseases and perform the relevant consultations. Teaching concentrates on the pathogenesis, diagnosis, clinical entities, treatment, epidemiology, and prophylaxis of parasitic, bacterial, viral and non-transmissible diseases of tropical countries. Addressed are the biology, epidemiology, and control of the causative agents, vectors and reservoirs. Additional topics include the characteristics of the various clinical disciplines in the tropical environment, problems of private and public health care in poor countries as well as structures and performance of developmental cooperation and disaster missions in medicine.		Given in Lima, Peru, this unique tropical medicine training initiative combines an international faculty with didactic and formal bedside teaching right in the tropics. Intensive diploma course in English with 380 contact hours: 160 formal lecture hours, plus diagnostic laboratory, daily ward rounds on a 36-bed tropical disease unit or daily out-patient clinic, and case conferences. Two 4-day teaching trips to field clinics in the Andes and Amazon. Scholarships are available to those who are both nationals and residents of a Latin American Country. Course language is English.	
Overseas opportunities for clinical time, if available	Komfo Anokye Teaching Hospital, Kumasi, Ghana		Yes. Graduates of this course will receive 3 weeks credit towards the clinical overseas requirement towards the ASTMH Certificate of Knowledge in Clinical Tropical Medicine and Travelers' Health	
Associated overseas sites	Kumasi Centre for Collaborative Research in Tropical Medicine		Instituto de Medicina Tropical, Universidad Peruana Cayetano Heredia, Lima, Peru

Annual dates	September to December (core course), April (advanced modules)			July 11 - August 5, 2016
Duration of course	13 weeks core course plus 3 weeks for advanced modules in Clinical Management of Tropical Diseases and Parasitology in International Health			4 weeks
Tuition	6,093,75 EUR			The full-time tuition rate is charged at a rate of \$1,020 per credit *. This rate does not apply to students taking courses for non-credit. The non-credit tuition rate is \$510 per credit *. Tuition does not include room and board. (* Data valid for academic year 2015-2016, in USD, subject to change)
Approximate living expenses per month	1,000			\$2,000 per J-1 visa recommendations
Additional academic degrees or credit offered	Master of Science in International Health			If taken for credit, participants will receive a document of completion for each module successfully passed, with a grade above the C average for the University. If participants take the modules for non-credit, they will receive a document of participation for each module and are not considered for any of the University's certificate programs for transcript and crediting requirements.
Brief course description	Our programme raises awareness of global health concerns and allows students to identify and analyse key factors shaping the health and well-being of populations. As a multidisciplinary approach it combines public health, epidemiology, tropical medicine, economics and management sciences, among others. The course is concerned with topics such as health promotion and prevention, treatment of poverty-related diseases, rehabilitation, strengthening health systems and informing health policy. The Diploma consists of a 13 week Core Course plus two advanced modules: Parasitology in International Health and Clinical Management of Tropical Diseases.			The Summer Institute in Tropical Medicine and Public Health is designed to provide training in key topics in tropical medicine and related public health issues through a multidisciplinary approach. It is also designed to prepare participants to work on current and emerging health problems in developing countries and the health problems of travelers. The curriculum contains current concepts and breakthrough research related to some of the most important tropical diseases today, and a host of expert lecturers present the most up-to-date findings on their work in these topics; <b>Module I:</b> Tuberculosis, HIV and Other Chronic Infections in the Tropics (223.685) <b>Module II:</b> Vector Borne Diseases in the Tropics (223.688) <b>Module III:</b> Intestinal Infections in the Tropics (223.688) <b>Module IV:</b> Child and Public Health In the Tropics (223.686)
Overseas opportunities for clinical time, if available	Not for clinical time, but students of the Master programme can choose advanced modules at universities that are part of the international tropEd network.			Yes, site research for various topics and with the course directors
Associated overseas sites	<a href="http://www.troped.org/">http://www.troped.org/</a>			Peru and Bolivia

Annual dates	Sept & Feb each year		London based: October - December	
Duration of course	3 months		3 months	
Tuition	GBP £5,250		London based: GBP £6350	
Approximate living expenses per month	GBP £700		GBP £1000	
Additional academic degrees or credit offered	MSc Tropical Infectious Diseases, MSc Tropical Pediatrics, MSc Biology & Control of Parasites and Disease Vectors, MSc Molecular Biology of Parasites & Disease Vectors, PhD		MSc programme/DRPH programme/PhD/Short Courses & CPD	
Brief course description	<p>Liverpool School of Tropical Medicine is the oldest school of tropical medicine in the world, and still at the forefront of research and education today - this well-established course gives a good grounding in tropical medicine and public health for the tropics. Practical teaching of diagnostic parasitology and vector biology is strong and all teaching is by faculty with extensive experience of working in low resource settings. Students come from a wide variety of international backgrounds and their expertise is shared in a friendly atmosphere. A major travel health clinic is situated in the school.</p>		<p>The Diploma in Tropical Medicine &amp; Hygiene (DTM&amp;H) is an intensive, three-month, full-time course in tropical medicine and public health for physicians. The course aims to teach doctors the skills required to understand, diagnose, treat and prevent diseases that are especially prevalent in tropical and developing countries where resources may be limited. The course has a strong epidemiological base but the scientific basis of infectious diseases is also given priority.</p> <p>A particular feature of the course is the diversity of students who attend. Among the 70 students who take the diploma course each year, more than 25 different countries are usually represented. Students range in experience from recently qualified doctors (though usually no earlier than 3 years post-graduation) to specialist infectious disease physicians and surgeons with many years of experience working in tropical and developing countries.</p> <p>The course is continually updated in response to changing needs, new developments in knowledge and technology, and student feedback. It has remained highly popular with students throughout its history which spans over 100 years.</p>	
Overseas opportunities for clinical time, if available	Yes, MSc students are encouraged to fulfill an overseas research project for their dissertation. DTM&H students generally work for NGO's after the course.			
Associated overseas sites			None

Annual dates	End of August to end of November each year		April to September
Duration of course	3 months 6 weeks in Tanzania plus 6 weeks in Uganda		6 months
Tuition	Self-Funding Applicants: GBP £7,000.00 for 2016 Full scholarships are competitively awarded to postgraduate doctors from African countries. There is an administrative fee of GBP £100		US\$ 4000
Approximate living expenses per month	International Students (fee-paying): GBP £3,000 (GBP £1,500 accommodation and visa permits + GBP 1,500 incidentals and food) Local Students (scholarships): GBP £1,500 (incidentals and food)		US\$ 700-1000
Additional academic degrees or credit offered	The East African DTM&H has been approved by LSHTM Senate as a postgraduate certificate qualification.  From 2016 students sitting the East African DTM&H will have the option of continuing with a blended learning MSc in Tropical Medicine and International Health at LSHTM. Students completing the course will be awarded 60 credits and a London School DTM&H.		Diploma
Brief course description	<p>The East African DTM&amp;H is a collaboration between LSHTM, University of Washington (UW), Johns Hopkins University (JHU), Kilimanjaro Christian Medical University College (KCMUC) and Makerere University (MU). The 3-month short course is based entirely in East Africa with the first six weeks at KCMUC in Moshi, Tanzania, and the second six weeks at MU in Kampala, Uganda. All students travel from Moshi to Kampala mid-way through the course.</p> <p>The East African DTM&amp;H takes the essence of the London course and translates it in to an African context. It emphasises experiential learning by immersing students in the clinical and public health issues facing African doctors today. Small group sessions are led by experienced physicians and at least a quarter of the course material is directly related to clinical practice.</p> <p>On completing the course we hope you will have gained an insight in to the practical realities of healthcare in East Africa. You should be able to evaluate the evidence for various health interventions, both public and individual, and make a safe and competent assessment of sick patients. In essence we intend the course to prepare you for a broad range of health work in Africa.</p>		Possess academic and professional ethics, gain able to theoretical and practical knowledge of tropical medicine as well as current medical innovations and practical applications, be able to efficiently analyze and solve problems related to tropical medicine using theoretical knowledge clinical experience gained during the program, work efficiently in a team or individually, conscientiously develop new skills and knowledge and utilize them effectively, be able to present and transfer knowledge and information using appropriate media and information technology resources.
Overseas opportunities for clinical time, if available	Approx 30 hours of ward based clinical teaching Approx 30 hours contact time with patients in field placements  Faculty offer career discussions about options to gain clinical experience in the Tropics after the course but this is separate to the DTM&H qualification itself.		N/A
Associated overseas sites	Kilimanjaro Christian Medical University College, Moshi, Tanzania Makerere University, Kampala, Uganda		None

Annual dates	Mid-Feb thru Mid May		Online Course (continuous, self-paced); Live Course (May annual) or Asia Clinical Tropical Medicine Course (July, every other year).
Duration of course	13 weeks		Course completion requires seven online modules (at own pace) PLUS two weeks in-person. Live Course available in Minnesota every May for four weeks (last two weeks required) OR ACTM Course in Thailand (two weeks).
Tuition	No tuition for U.S. Military & Public Health Service. \$1,500 for other federal employees. \$5,000 for civilian students. Foreign military: See MASL Course Number P175038		Full price (practicing providers): \$795 per module (online & Minnesota in-person); half-price (trainees, retirees, military, persons from developing countries) \$400 per module. Package (full course plus ASTMH exam review course): \$6,460. Asian Clinical Tropical Medicine Course (two weeks): ~\$1,950 (3 day extension - additional \$350).
Approximate living expenses per month	See Federal Per Diem rates. No central funding available.		Minneapolis, MN (moderately priced metropolitan city): ~\$500/week; Asian Clinical Tropical Medicine Course fee includes room & partial board.
Additional academic degrees or credit offered	Masters of Tropical Medicine & Hygiene (MTM&H), MPH with Tropical Public Health concentration, DrPH. Foreign Military: see MASL Course Numbers P175033, P175034, P175030		Certificate of Completion offered. CME and CE Credits. Medical School & Graduate level credits may be available.
Brief course description	Comprehensive coverage of the principles and practices of clinical tropical medicine and travelers' health, presented by a staff with decades of hands-on experience in medicine in the tropics. All of the individual courses that make up the USUHS ASTMH Diploma Course are graduate-level courses offered at the university.		Completion requires seven online modules (~35 hours/each) PLUS two in-person weeks. Unique aspects: migrant/refugee health, health disparities, disaster response, non-communicable diseases in addition to traditional tropical & travel medicine. Online portion is self-paced. Completion prior to the in-person is encouraged. Currently, two options for in-person experience. Minnesota (May) is experiential (e.g. interactive cases/exercises, laboratory, patient simulations, ultrasound, clinical skills, disaster management & "Global-is-local" field trips (e.g. Cambodian Wat). Alternatively, the ACTM course in Thailand (every other year) focuses on tropical diseases of Asia and includes patient contact, laboratory and field trips (e.g. snake farm, malaria research station).
Overseas opportunities for clinical time, if available	Yes for active duty military. Assistance can be provided in arranging overseas experiences for other government personnel.		ACTM Course (Thailand, extensions to Cambodia/Burma may be option—see website).
Associated overseas sites	Possible sites include: Thailand, Cambodia, Nepal, Peru, Kenya, Sierra Leone, Cambodia.		Global Health Pathway International Sites for residents only: Costa Rica, India, Tanzania, Thailand, Uganda.
