Clinical Pre-Meeting Course:

Migrant Health: Addressing Health Disparities – A Guide for the Practitioner

Saturday, November 4, 2017 1 pm - 5 pm
Sunday, November 5, 2017, 7 am – 3:45 pm
Hilton – Holiday Ballroom 1-2 (East Building, Second Floor)
Baltimore, Maryland

This course offers a comprehensive examination of the health disparities and unique health needs of diverse migrant populations, the systems designed to respond to them, and the skills needed by their healthcare providers. We will review the changes in migration over time and the value migrants bring to our societies. Various national screening strategies will be reviewed along with some disease-specific programs. Recent experiences in managing surges in migration will be presented. Cultural competence skills and their integral role in migrant care will be presented and illustrated through clinical cases. These topics will be presented by well-recognized faculty with a global perspective. The target audience includes any clinician who cares for migrants, would like to develop a deeper understanding of the broad context of migrant health, and expand their knowledge of conditions and skills needed to provide optimal care for this population.

Course Schedule

Saturday, November 4

1 pm – 1:15 pm  Introduction – Course Scope and Goals
Christina Greenaway, MD, FRCPC, Associate Professor, McGill University, Division of Infectious Diseases, Jewish General Hospital, Montréal, Quebec, Canada
Susan Kuhn, MD, MSc, DTMH, Associate Professor, University of Calgary, Alberta Children’s Hospital, Calgary, Alberta, Canada
