

Arboviral Diseases: An Emerging and Re-Emerging Public Health Threat

Seattle Convention Center - Room 615-617 (6th Floor)

Tuesday, November 1, 7 a.m. - 8:45 a.m.

Sponsored Symposium held in conjunction with the 2022 ASTMH Annual Meeting

Sponsored by valneva

This program provides an overview from experts in infectious diseases and travel medicine on arboviral diseases, especially those transmitted by *Aedes* mosquitoes in urban areas. The emergence or re-emergence of arboviral disease epidemics—including Zika in Latin America; yellow fever in Angola, Brazil, and China; West Nile in the Americas; dengue in the tropics and subtropics; and chikungunya, starting in East Africa and then spreading globally—have highlighted the urgent and continuing need for integrated and improved measures for control and prevention.

MODERATOR

Karen Krueger, MD, Assistant Professor of Medicine
Clinical Director, Travel and Immunization Clinic, Division of Infectious Diseases,
Northwestern University, Feinberg School of Medicine, Chicago, IL, United States

PANELIST

Jorge E. Osorio, DVM, PhD
