ASTMH 2020 CLASSIFICATION SYSTEM

DOMAIN I: LIFE CYCLES, EPIDEMIOLOGY, PATHOLOGY AND PATHOGENESIS OF INFECTIOUS DISEASES (15%) (see specific topics below)

DOMAIN II: DIAGNOSIS, CLINICAL MANIFESTATIONS, TREATMENT, AND PREVENTION OF INFECTIOUS DISEASES (25%) (see specific topics below)

Intestinal Protozoa
- Amebiasis; Giardiasis; Cryptosporidiosis and other coccidial infections; Nonpathogenic protozoa; Emerging topics

Blood and tissue protozoa
- Malaria; Leishmaniasis; Toxoplasmosis; Trypanosomiasis (African); Trypanosomiasis (American); Free-living amebae; Babesiosis; Emerging topics

Nematodes
- Ascarisis, trichuriasis, enterobiasis, hookworm, strongyloidiasis, and intestinal capillariasis; Lymphatic filariasis, onchocerciasis, loiasis, mansonellosis, and dracunculiasis; Trichinosis; Larva migrans: toxocarisis, creeping eruption, etc.; Other zoonotic nematodes: anisakiasis, angiostrongyliais, gnathostomiasis, oesophagostomum; Emerging topics

Cestodes
- Intestinal tapeworms; Cysticercosis and echinococcosis; Other larval cestode infections; Emerging topics

Trematodes
- Schistosomiasis; Intestinal flukes; Liver flukes; Paragonimiasis; Emerging topics

Disease caused by bacteria
- Typhoid fever; Other salmonellosis; Cholera and other secretory diarrheas; Other vibrios; Shigellosis; Campylobacter, Yersinia, E. coli, and other bacterial causes of diarrhea; Neisseria meningitidis and other causes of meningitis; Tuberculosis; Leprosy; Atypical mycobacterial infections; Respiratory infections (bacterial); Tetanus; Diphtheria; Streptococcal infections including rheumatic fever; Melioidosis; Brucellosis; Bartonellosis; Sexually transmitted infections (syphilis, gonorrhea, chancroid, lymphogranuloma venereum, granuloma inguinale, and nongonococcal urethritis); Plague and tularemia; Anthrax; Q fever; Rickettsia infections including typhus, spotted fevers, scrub typhus;
Ehrlichiosis and anaplasmosis; Leptospirosis, nonvenereal treponemal spirochetes, and borrelioid infection; Trachoma and other nonvenereal diseases caused by chlamydia; Emerging topics

**Diseases caused by fungi**
- Histoplasmosis, blastomycosis, paracoccidioidomycosis, and coccidioidomycosis;
- Subcutaneous mycoses: mycetoma, sporotrichosis, and chromoblastomycosis;
- Opportunistic mycoses: Candida, Cryptococcus, talalaromycosis, and pneumocystosis; Emerging topics

**Diseases caused by viruses**
- HIV infection; Hepatitis; Yellow fever; Dengue; Other flaviviruses: Zika, Japanese encephalitis, West Nile, tickborne encephalitis; Rabies; Bunyaviruses: Rift Valley fever, Crimean Congo hemorrhagic fever, hantaviruses, sandfly fever, and Oropouche; Lassa and other arenaviruses; Filovirus: Ebola, Marburg; Chikungunya; Other Alphaviruses: Venezuelan equine encephalitis, Ross River, Mayaro; Smallpox and monkeypox; HTLV-1; Avian influenza; Respiratory infections (viral); Rotavirus and other causes of diarrhea; Polio; Measles; Emerging topics

**Ectoparasites**
- Lice; Scabies; Myiasis; Emerging topics

**DOMAIN III: NONINFECTIOUS DISEASES (10%)**

**Nutritional disorders**
- Principles of nutrition; Infection and nutrition; Malnutrition and refeeding; Vitamin and mineral deficiencies

**Environmental disorders**
- Heat; Cold; Altitude and diving

**Poisonous and toxic plants and animals**
- Poisonous plants; Shellfish and fish poisoning; Venomous reptiles and marine animals; Biting and poisonous arthropods

**Post-infectious sequelae**
- Complications requiring surgery; Oncologic; Post-inflammatory (e.g., lymphedema, irritable bowel syndrome)

**DOMAIN IV: APPROACH TO CLINICAL SYNDROMES (16%)**

**Cardiovascular symptoms and signs**
- Heart failure; Valvular disease; Arrhythmia

**Dermatologic symptoms and signs**
- Cutaneous ulcers; Cutaneous nodules; Fever and rash; Pruritus; Pigmentary disorders
Gastrointestinal symptoms and signs
- Acute diarrhea; Chronic diarrhea; Abdominal pain; Jaundice; Hepatobiliary

Neurologic symptoms and signs
- Seizures; Paralysis; Altered mental status; Meningitis and encephalitis; Chorea and other movement disorders

Ocular symptoms and signs
- Vision loss; Inflammation

Genitourinary symptoms and signs
- Hematuria, sterile pyuria, and chyluria; Ulcers, discharge, and lymphadenopathy; Cervical or bladder lesions

Respiratory symptoms and signs
- Fever and acute cough; Chronic cough; Hemoptysis, cavitary lung lesions, and pulmonary nodules; Wheezing

Hematologic symptoms and signs
- Anemia; Eosinophilia; Leukopenia and thrombocytopenia; Splenomegaly

Other fever syndromes
- Undifferentiated fever; Fever and arthritis; Manifestations of agents of bioterrorism

DOMAIN V: TRAVELERS' HEALTH (15%)

Clinical epidemiology and distribution of diseases
- Travelers; Migrants

Preventive Medicine
- Pre-travel risk assessment; Available vaccines: indications, dosing, adverse effects; Prophylaxis; Prevention of diseases transmitted by food, water and soil; Prevention of diseases transmitted by arthropods and animals

High-risk travelers
- Pregnant; Pediatric; Immunocompromised; Chronic disease

Air and sea travel
- Jet lag; Motion sickness; Spread of infection; On-board care

Other conditions
- Cultural adaptation; Mental health; Altitude sickness; Air pollution; Trauma and injury
The ill traveler
• Self-treatment; Medical care abroad; Post-travel assessment and screening

**DOMAIN VI: PUBLIC HEALTH IN THE TROPICS (9%)**

**Maternal and child health**
• Epidemiology of maternal mortality and morbidity; Epidemiology of childhood mortality and morbidity; Breastfeeding (including HIV transmission)

**Water, sanitation, and hygiene**
• Water supply; Wastewater management; Sanitation

**Community approaches to primary health care**
• Preventable illness: children and adults; Chronic diseases and disability; Essential drugs; Vaccine-preventable diseases; Mass supplementation and chemotherapy programs

**International, government, and nongovernment organizations in the tropics**
• International Health Regulations; Professional standards; Ethics; Health systems structure

**Disease control**
• Investigation and control of outbreaks and epidemics; Principles of surveillance; Approach to disasters, international emergencies; Biosafety: containment of current pathogens and emerging pathogens; Pest and vector control

**DOMAIN VII: DIAGNOSTIC TOOLS (10%)**

**Laboratory procedures and techniques**
• Smears of blood and other fluids; Biopsy specimens (e.g., skin, bone marrow); Stool specimens for microscopic examination; Cultures for bacteria, fungi, and parasites

**Laboratory interpretation and identification**
• Routine tests (e.g., complete blood count, urinalysis); Microscopic identification of bacteria, fungi, viruses, protozoa, and helminths; Macroscopic identification of common helminths (e.g., Ascaris, tapeworms, pinworms) and ectoparasites; Interpretation of serologic tests for protozoa, helminths, bacteria, fungi, and viruses; Special tests (e.g., molecular diagnosis, histopathology, point-of-care testing)

**Radiologic image interpretation**
• Radiograph; MRI/CT scan; Ultrasound
